Domain Mirror	☐		☐	Annual - $25

Extra Requirements

If you would like to have your emails protected from viruses and/or spam please tick the boxes below.

☐ EMAIL VIRUS SCANNING $99 per domain per annum

The email antivirus service works by scanning all your incoming mail for viruses. If a virus is detected, the entire message is quarantined on Westnet's servers and a notification message is sent to you detailing the infection.

☐ EMAIL SPAM FILTERING $49.95 per domain per annum

Spam can be difficult to detect; hence the prevention of spam can also be very difficult. The method we will be using does not guarantee that you will not receive any spam, but it will significantly reduce the amount of spam you receive.

Preferred Server

Please select either Windows or Linux as a web server to host your website. If you are not sure which web server is best for you, chances are that either will do. Unless you specify your choice of web server Westnet Hosting will create your web hosting account on the Windows web server.

☐ Windows Server (default)

☐ Linux Server
